EDUCATION

Full-Stack Course
Yaniv Arad, Tech Training Labs, 2022

- MERN Stack - React, Node JS, Express JS, MongoDB
- Live development environment that included handling various tasks while working on the main project

The complete 2022 Web Development Bootcamp
Dr. Angela Yu, Udemy

CORE COMPETENCIES

- Programming languages: HTML, CSS, JavaScript (include ES6), ReactJS, NodeJS, ExpressJS, REST APIs, Python.
- Work environment: VScode, MySQL, Postman.
- Operating systems: Windows
- Databases: MongoDB, Firebase, MySQL
- Organizational systems: CRM, Priority

SKILL HIGHLIGHTS

- Multilingual – Hebrew, English, Russian
- Attention To Detail
- Collaborative Team Player
- Pragmatic & Creative Problem Solving
- Excellent Written & Verbal Communication Skills
- Critical & Analytical Thinking

MILITARY SERVICE

Combatant, Search and Rescue
IDF | 2013 - 2016

PROFILE

Enthusiastic Full Stack Developer, specializing in React\NodeJS\JavaScript, looking to continue growing and develop world-class software solutions. Driven by data, and motivated by people, I excel at resolving problems creatively, taking part in complex projects, and meeting hard deadlines. With outstanding motivation and comprehensive Full Stack Development knowledge, I am eager to continue my journey, committed to delivering excellence in everything I do.

EXPERIENCE - PROJECTS

Full Stack Developer, Various Projects | 2022

Football scouting system, React, Node JS, Express JS, and MongoDB - offered for sale
Shift Arrangement System - React, Node JS, Express JS - Freelancer
Cinema Management System - React, Redux, NodeJS, ExpressJS, MongoDB
Linkedin search jobs bot - Server Project - NodeJS, Puppeteer, Nodemailer
Store Management Project - React, Redux
User's Tasks & Post Project – React
A Search of Products Project - Node JS, MySQL

- Demonstrated a strong ability to multi-task and prioritize demands while meeting deadlines in a timely and courteous manner throughout the agile Full Stack development lifecycle.
- Conducted full-stack development using React, NodeJS, Express JS, Redux, MySql, and MongoDB.
- Applied technical skills and knowledge of coding best practices to develop web services, applications, and databases, as well as learned to diagnose software issues and defects.
- Maintained adherence to high standards and project deadlines by generating accurate documentation of requirements and specifications.
- Defined project scopes and deadlines by conducting requirements analysis to identify project interfaces and system requirements.
- Leveraged exceptional communication skills to convey complex technical information to internal and external stakeholders of varying knowledge.
- Improved team productivity by optimizing operational processes, resolving technical issues, and leveraging my ability to collaborate effectively with other team members.

OTHER EXPERIENCE

Private Teacher - React, Node JS, Express JS, and MongoDB
Self-Employed | 2022 – Present

- Conducting private lessons for a group of 8 Computer Science & Software Engineering students in the subjects of React and NodeJS mainly.
- Guiding the students throughout their projects from the planning and specifications phases to the testing and delivery phase.
- Designing and integrating technology into lessons according to curriculum guidelines and student needs.
- Identifying group and individual student knowledge and understanding gaps through testing and evaluations.
